- Design : Figma, Canva
- Low/No Code Tool : Wordpress, Shopify, N8N & Wix

Education

- B-Tech (2023-2026) Pursuing
- Government College Of Engineering, Nagpur
 - Computer Science & Engineering
- Diploma (2020-2023)
- Government Polytechnic, Arvi
 - Computer Engineering
 - 85%
- SSC (2019-2020)
- Shri Samarth High School, Ghatanji
 - 88%

Core Competencies

- Full Stack Web Development
- REST API Development
- AI Chatbot Integration
- Workflow Automation (n8n)
- Team Leadership & Collaboration
- Responsive UI & Performance Optimization

Experience

Bhrraman

Position: **Full Stack Developer**

Duration: April 2026 - June 2026

- Maintained and enhanced the **Bhrraman travel website**, improving **performance, responsiveness, and user experience** using Next.js and modern web technologies.
- Led the technical development of the **Bhrraman Transfers web application**, managing scalable architecture and feature implementation for global transfer booking services.
- Integrated APIs, optimized workflows, and implemented real-time functionalities to streamline booking and customer management processes.

Brenzo Ai

Position: **Full Stack Developer**

Duration: March 2026 - May 2026 (2 Month)

- Developed and managed **AI-powered WhatsApp automation workflows** using n8n for lead handling, follow-ups, and customer engagement.

- Built and optimized chatbot automations for industries like travel, healthcare, and real estate to improve response time and lead conversion.
- Integrated AI chatbots with WhatsApp and CRM workflows to automate inquiries, appointment booking, and customer communication.

Google Developer Group (GDG) On Campus

Position: **Development Lead**

Duration: 2024 – 2025

- Led a team of developers to create solutions for GDG events and activities, **achieving Tier 1 position in Google Cloud Study Jam.**
- Managed the development of a platform for listing GDG events and publishing blogs, including a dashboard for website management and bulk emailing functionality with custom templates.
- Collaborated with cross-functional teams to ensure timely delivery of projects and maintain high-quality standards.

EboNow

Position: **Full Stack Developer**

Duration: 2 Months

- Contributed to the development of a **Party Decor Application** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- Enhanced application functionality and user experience, ensuring responsiveness and scalability.
- Worked closely with the design and product teams to implement features and fix bug

Projects

Bhrraman Transfers ([Link](#))

- Scalable web application providing global transfer services, enabling users to book transportation across multiple locations worldwide. The platform integrates **Google Maps API** for location search, route optimization, and real-time directions.
- **Tech Stack** : React Js, Next Js, Node JS, Express Js, Redis, Google API

Bhrraman Website (Travel Agency) ([Link](#))

- Scalable travel agency website featuring AI-powered itinerary generation along with automated content creation for pages, blogs, and destination listings. Designed for high performance using server-side rendering (SSR) and optimized caching.
- **Tech Stack** : React Js, Next Js, SSR, Redis

Real Estate AI Chatbot ([Link](#))

- Developed an AI-powered chatbot enabling users to discover properties based on requirements and book appointments automatically.
- Integrated Gemini API for natural language understanding and n8n for workflow automation.
- Reduced manual inquiry handling by 70% through automation.
- **Tech Stack** : Next.js, Tailwind CSS, MongoDB, n8n, Gemini API

EventEase ([Link](#))

- Find verified event managers and vendors, explore past successful events for inspiration, and plan everything from one smart dashboard.
- **Tech Stack** : Next.js, Tailwind CSS, MongoDB.

GDGC Platform (Admin : [Link](#), Platform : [Link](#))

- Developed a platform for listing GDG events and publishing blogs, featuring a dashboard for website management and bulk emailing functionality with custom templates.
- **Tech Stack** : Next.js, Node.js, Tailwind CSS, MongoDB.
